

PRESS RELEASE

Smart and lightweight vortex flow meter

Mass Flow ONLINE B.V. presents a new gas flow meter, available via their internet store. GAS-VIEW is a compact, lightweight and cost-effective solution for monitoring the flow or consumption of gases. The mains or battery powered flow meter offers an easy-to-read LCD display and has integrated totaliser and alarm functions. Furthermore the instrument can be supplied with an analog output or with two alarm outputs, thereby operating as a flow switch. The instruments may be mounted in any position; the local readout unit can be rotated. The GAS-VIEW "lite" version has no local readout and only a pulse output. The flow meters can be supplied in full scale ranges from 17 l/min up to 850 l/min at max. 10 bar pressure rating.

GAS-VIEW can be easily ordered from stock at Mass Flow ONLINE B.V. 24 hours a day, 7 days a week on www.massflow-online.com. From this web shop, we deliver competitively priced, high quality products with excellent delivery time. Your on-line order will be shipped within two working days.
