

PRESS RELEASE

High-precision control valves for low flow rates

Via their internet store, Mass Flow ONLINE B.V. offers a series of new manual control valves for low gas or liquid flow rates. FLOW-ADJUST manual control valves are designed for extremely precise control in low flow gas and liquid applications. The valves are available in two standard-resolution and five high-resolution models, offering a smooth control of gas or liquid flow. The standard resolution needle valves cover the two highest flow ranges whereas the high resolution valves cover the lower gas and liquid flow ranges.

The FLOW-ADJUST series control the flow of gases and liquids which are compatible with the wetted parts specified in this leaflet. The valves are designed to withstand up to 150 PSI working pressure. Various Kv-ranges are available in 7 different models as in-line valve assemblies with G ¼" BSPP female inlet and outlet ports.

FLOW-ADJUST can be easily ordered from stock at Mass Flow ONLINE B.V. 24 hours a day, 7 days a week on www.massflow-online.com. From this web shop, the company delivers competitively priced, high quality flow technology products with excellent delivery time. On-line orders will be shipped within two working days.
