## Cutting-Edge Mass Flow Meters Available Online

Bronkhorst High-Tech proudly presents the latest innovation in our MASS-STREAM series: the robust D-6400 generation, now available for online purchase exclusively on Mass Flow Online. With our streamlined ordering process, expect prompt dispatch within just 2 business days when items are in stock.

Our rugged IP65 protected mass flow meters offer an extensive measurement range, spanning from 0.5 to 50 l<sub>n</sub>/min up to 10 to 1000 l<sub>n</sub>/min Air equivalent. Utilizing the direct thermal measuring principle, MASS-STREAM ensures minimal pressure drop and exceptional resilience to environmental factors such as moisture or particulates. Featuring ISO-1179-1 inlet threads, compatibility with standard connectors is seamless. Experience the convenience of onboard display functionality, providing real-time data on actual flow, totalized flow, alarms, and easy selection from 6 pre-installed gases (Air, Nitrogen, Oxygen, Argon, Carbon Dioxide, Methane), with additional gas options available via the FLUIDAT Onboard database.

These versatile instruments find application across various industries, including food and beverage processing, chemical and petrochemical sectors, fermentation installations, and biotechnology. With their unparalleled features, Bronkhorst's mass flow meters are poised to exceed your expectations. Discover the difference today and explore our web shop for comprehensive technical specifications, live stock updates, and competitive pricing. With a hassle-free account setup, placing orders is simple and efficient.
